Dear Parents/Guardians,

Thank you for your support in creating a successful and special football program. For a program to meet its full potential, it takes hard work year round. The mission of the True Patriots Program is to build the whole person which involves close monitoring of academics. We want our young adults to have options along with confidence upon graduating high school.

In order to set up each person for success, they need to be placed in the best environment and group. Out of respect of privacy we do not request PIV information but rather use a different tracking method within the PIV system. The method described below will allow for weekly emails to be sent directly to our emails. We will be able to monitor the student's progress and help them achieve their goals. The procedure cannot be made mandatory but is strongly encouraged. The reports alone will not resolve all academic struggles but it will bring to light the issues so that a plan can be put in place.

Please take time to follow the steps below and sign the permission slip. Let's be successful in everything we do.
"Everything Done Right"

Sincerely,

Darren DeMeio
